

NR-19 PVT and Fluid Property Summary

Fluid-property records used for supplied-source checks. Values below are source records and should not be replaced by external correlations.

Fluid Properties

record_id	well_id	reservoir_zone	oil_api	oil_fvf_rb_stb	gas_specific_gravity	gas_reservoir_factor_rb_mscf	pressure_gradient_psi_ft	source_note
PVT-001	NR-101	Upper/Lower Sand	34.1	1.215	0.78	0.066	0.433	commingled PVT summary
PVT-002	NR-102	Upper Sand	35.4	1.195	0.76	0.063	0.433	upper sand PVT table
PVT-003	NR-103	Lower Sand	31.8	1.235	0.82	0.072	0.445	lower sand PVT table
PVT-004	FIELD	Upper Sand		1.205		0.065	0.433	allocation default for upper sand voidage
PVT-005	FIELD	Lower Sand		1.235		0.072	0.445	allocation default for lower sand voidage

Known PVT Gaps

record_id	well_id	property_name	source_value	unit	note
PVT-GAP-001	NR-103	GOR correction factor		dimensionless	not supplied for May allocation package
PVT-GAP-002	NR-104	active PVT set		text	well shut-in; no active PVT set in package

Property Use Notes

record_id	note_text
PVT-NOTE-001	Pressure-gradient values in this file are supplied source values for datum correction checks.
PVT-NOTE-002	Voidage calculations should use supplied oil_fvf_rb_stb and gas_reservoir_factor_rb_mscf only when the matching reservoir zone is explicit.
PVT-NOTE-003	Do not substitute external PVT correlations for blank or unsupported source values.
